Phone: 785.337.2216

Fax: 785.337.6054

March 22, 2021

Dear City of Hanover Resident,

The City of Hanover water project will begin in just a few short months. This project will include replacing all cast iron mains within the city limits of the City of Hanover. The project is expected to begin mid-May and be completed by March 2022 as long as everything goes as planned. The project was awarded to J&K Contracting out of Junction City, Kansas.

This project will include new water mains, valves, fire hydrants, service lines to the meter pit, and new meters. There will be utility flags on city easements to mark these places, please do not pull them or mow over them so our contractors know where utilities around properties are located. If these flags are pulled or mowed over, this will prolong the project.

Things to expect during this project include, but are not limited to, little to no water pressure during construction and road closures. Between the City of Hanover and the contractor, we are going to do our best to notify your household of these road closures and possible little to no water pressure.

The contractors and the City of Hanover will be notifying you by door hangers as much as possible, but other ways to stay notified is to check our city website, www.cityofhanoverks.com, and our texting service, **text HANOVER to 33222**.

If you have any questions or concerns, please contact the city workers and/or the city council.

Thank you,
The City of Hanover
